

Corrupt Conceptions of Covid-19
Julia Kowalski & Macy Ferenstein

Symptoms of the Coronavirus come in various trends,
Discrimination faced by the elderly, high-risk and Chinese never ends.
From Tik Tok to Twitter,
From Gen Z to Boomers
The internet is infected with horrible rumors.

The oldest generation,
Is the most vulnerable in our nation,
Taking the most infiltration
From this viral mutation.
The discrimination against this population that is eminently disadvantageous,
Creates a hatred towards them for something that is severely contagious.

Obesity, asthma, and diabetes are all included,
In the list of factors that make a person feel secluded.
With society's submissions,
Of these high risk conditions,
The fear inside these individuals elevates,
As the rest of the world speculates.

When the world is under pressure
People need someone to blame,
They point their finger at the Chinese citizens,
Only causing them unnecessary shame.
Although it is only their genetics,
Our country remains unapologetic.
Even though it is out of their control,
The hurtful accusations still take a toll.

All these unintended symptoms
Fuse together to allude,
That our country needs to be corrected
To prevent these people from being negatively affected.
Once this equality is so importantly achieved,
Happiness and embracement for all will finally be received.
