

Hate Crimes in the World Today

Today's world is filled with hate due to the recent pandemic. This has caused blame to be placed on who started this terrible pandemic which was quickly pointed to the Asian Pacific Islanders (API). This made all people associated with this title a suspect to many hating people. These people may not even come from where the haters think but still they are ridiculed and hated. This included them being threatened, bullied, harassed and more for something they didn't even do. To spread awareness for this subject and more relating to this terrible pandemic I will host a day of Awareness to help those who are affected not feel alone in their struggles. This will also bring others who were not affected to have more understanding on this topic and many more that have been caused by Coronavirus.
